Sister's art exhibit at Six Elzévir is once more an invitation to wander through urban landscapes.  
27 paintings for a moving view.

From the clearness of dawn to evening vibrations.  
From evening mists to dizzying nights,  
the city is enlightened by fugitive glimmers.

Trembling shadows, silent observers and slow-motion strollers on the river banks  
witness the rumors of passing time.

Rediscovering the fleeting sensations of everyday life,  
faraway souvenirs inside sleeping memories.  
To be touched by wild grass swaying in the wind.  
Always with the same astonishment.

In the darkest hours of the night, enigmatic beacons.  
From the deepest waters, shivery signals.  
In the middle of a dream, something seems unfinished.  
Around a street corner, something like a fulgurance.

Serendipity.

Light are the lights as they pass by.
